! *Assembly instructions for the intermediate shelves of the Demeter M and XL can be found here:
raised bed Demeter - from page 10
raised bed Demeter slim - from page 12*

Thank you for choosing our Demeter raised bed.

For the sake of the environment, the raised bed is made of **100 percent recycled plastic**. It is also **easy to care for** and **weather-proof**. Thanks to its **simple and timeless design**, it will fit in any garden.

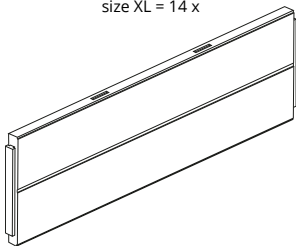

Below you will find the assembly instructions. **You do not need any additional tools** – simply connect the individual parts to assemble.

Do not hesitate to contact us with any further inquiries:
service@khw-geschwenda.de

assembly

Connect the adapter on the
intermediate floor to the posts

Installation of several intermediate shelves next to each other

If you wish to install the decking on both sides of your Demeter XL raised bed, there is a special feature to the assembly.

Depending on the number of shelves attached to each post, you will need to cut off the teeth on the adapters on the shelves BEFORE ASSEMBLY.

Cut off 2 teeth if you want to install 2 shelves side by side (e.g. Demeter XL raised bed).

Up to 3 teeth can be cut off for individual combinations of raised beds (see examples on pages 16 and 17).

Extension sets

raised bed Demeter

You can order the **extension set** for our **raised bed** at any time **online at www.impianto.de** and increase the size of your raised bed by another **168 l**.

This contains:

- 3 x segment
- 2 x posts
- 2 x cap
- 2 x adaptor

raised bed Demeter slim

There is also an extension set for our **slim raised bed** - available **online at www.impianto.de**. Simply reorder and enlarge your raised bed by another **122 l**.

Dieses enthält:

- 2 x segment wide
- 1 x segment slim
- 2 x posts
- 2 x cap
- 2 x adaptor

How to lay out your raised bed correctly

- Fill the raised bed with **four layers** in roughly equal parts so that the **decomposing bacteria** work optimally.
- A thin drainage layer of **gravel** serves as a base.
- Then comes **coarse green waste** (e.g. twigs or branches) on top of which comes a layer of **finer green waste** (e.g. lawn clippings and autumn leaves). This is followed by a layer of **normal garden soil** and finally the planting layer of a mixture of **compost and potting soil**.
- Go for a **colourful mix of plants** – this way, you will automatically have fewer pests and better plant growth.
- In the **first year**, the layer can **sink down** by 10 – 20 cm. Fill up the difference with plant soil.
- **Renew** the filling of the raised bed after **5 – 7 years**.

We wish you much success!

Are you familiar with ... our tomato hat?

It **protects** the delicate tomato plants, thereby ensuring an **ideal growing climate** and a **good yield**.

Use it as a **mobile greenhouse** for balcony, terrace, and allotment garden.

The advantages:

- **no need to determine the location of the tomato hat**
- the tomato hat can be adapted **to the size of the tomato plant**
- it is **easy to assemble without tools**
- the tube of the tomato hat **only waters the root of the tomato**
- the **film protects** the tomato plant from storms, hail and cold
- the **harvest period is extended** into the autumn

We are also the right partner in winter!

On a sled from our **Junior** series, even the youngest children can have fun in the snow.

Later on, the models from the **Classic** range ensure speedy descents on the toboggan slope.

The sledges from the **Adventure** range are an intense experience for young and old.

Our sleds are:

- made in Germany
- TÜV-tested
- free of harmful chemicals
- made of high-quality cold- and light-resistant plastic
- comfortable and ergonomic
- certified with the spiel gut seal*

* this applies only to selected models
